Fix Version/s:	Version 1.0

Type:	Task	Priority:	Medium
Reporter:	IT Factory	Assignee:	Unassigned
Resolution:	Done	Votes:	0
Labels:	None		
Original Estimate:	Not Specified		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		

Description

In the default theme of the store front, parent categories are listed in the top menu of the home page, and on the left side of product pages. This navigational feature is used to guide customers to similar products within the same category. Exposing customers to different products within a category lets the customer compare the similarities and differences between products to make the most informed purchase. When adding products to the store, you will be asked for a product category to sort them in. It is a good idea to establish these categories before adding products, to save yourself the trouble of adding the category name to the products later.

To access the Category page in the administration, hover over the Catalog button and click on Category in the drop-down. You will be directed to a page that displays the category names of the store products (as seen in the attachment).

The categories (as seen in the attachment) were included with the default products provided by the install.

Description

When a customer creates an account or completes the checkout process, OpenCart will store their information automatically in the administration to be accessed under Sales>Customers>Customers. A complete list of customers will be displayed on this page, along with the following information:

- Customer Name
- E-mail: Saves the email address for confirmation emails, notifications, newsletters, etc.
- Customer Group: A designated group of customers used to apply discounts/specials and send group emails.
- Status: Denies or approves customer account login.
- Approval: Approves the customer account after creation.
- IP: An address that reveals the location of the customer.
- Date Added: The date the customer account was created.
